Lab 4 – Pentaho Data Integration (Kettle) Tutorial

1.1. Goals

Follow a tutorial to learn how to use the Pentaho Data Integration (Kettle) tool.

1.2. Lab preparation

All required software will be available in lab computers. If students intend to follow the tutorial using their own computers, Pentaho Data Integration CE 5.4.0.1 version must be installed beforehand: http://sourceforge.net/projects/pentaho/files/Data%20Integration/5.4/pdi-ce-5.4.0.1-130.zip/download

1.3. Tasks to perform during the lab

During the lab a guided Pentaho Data Integration Tutorial will take place (see slides available with this lab guide). You will be required to follow the explanation and reproduce the steps on the lab's computer (or your own if you so choose).
